58 Scotties registered in the month of January 1925

Note of interest: It was not until Jun 1, 1932 that it was ruled all litters whelped in the USA on and after January 1 1932 must be registered by the person who owned the dam on the date of whelping, otherwise the dog from any such litter will be ineligible for registration. The individual dog must be registered by the person who owned the dam on the date of whelping, who is to be known as the first owner, or else by the second owner. No one else may register the dog. At that time fees were \$1.00 per litter for applications received within 60 days of birth of the litter and \$2.00 per litter afterward.
