

DOG PHOTOGRAPHER

I can't resist a camera's lure,
but shots I take are just a blur,
too dark, too light, or too obscure.
It's clear I'm no photographer.

He poses so presentably
how could it not enable me
to point and shoot successfully
with auto-set technology?

His patience only tests my verve
to elevate my learning curve
to photograph what I observe
and print the pictures we deserve.

My puppy knows I'll always be
a picture-taking oddity
who fails at simple imagery,
but still I try. Say "Cheese" for me.
